

**Integra Canadian Value Growth Fund
Semi-Annual Management Report of Fund Performance
As at June 30, 2010**

This semi-annual report of fund performance contains financial highlights but does not contain the complete semi-annual financial statements for the Investment Fund. You may request a copy of the semi-annual financial statements at no cost, by calling 1-800-363-2480, by writing to us at Integra Capital Limited ("Integra"), 2020 Winston Park Drive, Suite 200, Oakville ON L6H 6X7 or by visiting our website at www.integra.com or the SEDAR website at www.sedar.com.

Security holders may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or portfolio disclosure relating to the Fund.

**Management Discussion of Fund Performance
Results of Operations**

For the six months ended June 30th, the Fund lost 4.3% compared to a decline of 2.6% experienced by the TSX index while the Fund's benchmark (90% S&P/TSX Composite Index plus 10% Scotia Capital 91-day Government of Canada Treasury Bill Total Return Index) dropped 2.3%. All of the returns are presented gross of fees.

Canada's economy is largely export-driven due to the magnitude of its natural resource industries. Therefore, how the rest of the world is doing has a large influence on the health of our domestic economy.

In the early stages of 2010 there was a cautious, but generally positive sentiment about the state of the global economy. However, during the past three months, volatility returned to the capital markets. Investors became wary of the escalating Greek deficit and the potential for other heavily indebted Euro-zone members to default.

There were also concerns about the health of European banks and a stalling U.S. recovery, as inventories have been rebuilt. Additionally, the United Kingdom must deal with debt concerns, as well as a divisive general election result and a call from the new government for massive cuts in public spending.

In China, policies were introduced to slow down a property boom. Incremental lending restrictions on second and third homes were introduced. The collateral effect is a weakening demand for materials used in that sector.

At the G-20 meetings in June, world leaders pledged to cut government deficits in half by 2013 and stabilize debt loads by 2016. They went a step further, agreeing to present their respective fiscal positions for peer review at the next meeting later this year in Seoul.

In advance of the meetings in Toronto, China announced it would no longer peg its currency, the yuan, to the U.S. dollar. Once the Chinese gave into international pressure, the yuan gained value.

In Canada, only four of the ten sectors within the stock market were positive over the first six months of the year. The industry groups contributing the most to the decline in the TSX through the end of June were Energy, Information Technology and Financial Services stocks. The Information Technology business group was largely influenced by the sell-off in Research in Motion. The Financial Services sector, after doing well over the first three months of this year, turned negative as concerns about the European debt situation mounted. Conversely, Telecom Services and Consumer Discretionary stocks generated the largest positive contributions to the index.

The Fund fell short of its benchmark during the first half of 2010 due to stock selection in the Materials (over-weight to base metals) and Energy sectors, coupled with an over-weight to the information Technology sub-index which was the worst performing business group in the TSX up until June 30th. Stocks detracting from performance included Research in Motion and Shoppers Drug Mart. In the case of each of these stocks, valuations continue to be attractive, the basic business models have not changed, the companies are dominant in their markets and have strong management teams. Research in Motion is dealing with the fear of competition from the iPhone but continues to generate solid profit growth. Shoppers Drug Mart came under pressure following the Ontario government's announcement that it would be cutting back prices of generic drugs in an effort to reduce health care costs, yet the company's unit growth remains strong.

The Fund benefited from stock selection in the Financial Services sector. The top holdings in this sector are TD Bank, Bank of Nova Scotia and Royal Bank of Canada.

The Fund experienced net redemptions of \$6.7 million during the first six months of 2010.

Fund expenses vary period over period mainly as the result of changes in average Net Asset Values and investment activity. Custody expenses were higher year over year due to increased activity in the Fund. Operating expenses increased year over year largely due to a variance between the budgeted amount of expense accrued in the latter portion of 2009 versus the actual expense that was incurred during that period.

Recent Developments

While global economic activity is improving, significant headwinds remain, particularly within the developed world where mounting sovereign debt threatens long-term economic gains. Emerging markets have held up relatively well, primarily because they have managed their economies frugally throughout the past several years. Globally, corporations are generally enjoying expanding profit margins largely due to cost cutting rather than growing revenues, while balance sheets remain solid with an abundance of cash.

Macroeconomic factors continue to dominate the outlook for investment heading into the second half of the year. Investor sentiment has become distinctly more focused on the downside risks for growth and the possibility of deflation.

The global economic expansion has clearly slowed down but remains positive and strong enough to continue supporting earnings growth. Also, the problems in Europe are more likely to keep central banks leaning towards relaxed monetary policies rather than shifting to the introduction of higher interest rates since inflationary risks remain minimal. Additionally, the recent pullback in stock prices has removed excessive optimism.

Recent additions to the Fund include Brookfield Properties, Centerra Gold, Trican Well Services, Magna, Loblaw Company and Inmet Mining.

The Fund is managed by Integra. Integra provides or arranges for the provision of all general management and administrative services rendered by the Fund in its day-to-day operations, including providing or arranging the provision of investment advice and record-keeping services for the Fund.

As a result of providing investment advisory and management services, Integra is entitled to receive a monthly fee from investors in the Fund.

Caution Regarding Forward-looking Statements

This report may contain forward-looking statements about the Fund, including its strategies and expected performance. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to potential future events or market and economic conditions.

In addition, any statement that may be made concerning future performance, strategies or prospects and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to risks, uncertainties and assumptions about the Fund and capital market and economic factors.

Forward-looking statements are not guarantees of future performance, and actual events and results may differ materially from those expressed or implied in any forward-looking statements made by the Fund. A wide range of factors may contribute to these variances, including general economic, geopolitical and market influences in Canada or globally, interest rates and currencies, capital markets, technology innovations, regulations and catastrophic events.

Investors are encouraged to consider these and other factors including their own investment objectives carefully before making any investment decisions and are urged to avoid placing undue reliance on forward-looking statements.

Additionally, investors should be aware that the Fund has no specific intention to update any forward-looking statements whether as a result of new information or future events, prior to the release of the next Management Report on Fund Performance.

Ratios and Supplemental Data (Based on trading NAV)

	2010	2009	2008	2007	2006
Net Asset Value (000's)	\$120,298	\$132,073	\$140,484	\$59,558	\$70,192
Number of units outstanding	9,087,260	9,550,980	13,489,967	3,623,031	3,927,308
Management expense ratio	2.08%	2.03%	2.14%	2.18%	2.18%
Management expense ratio before waivers or absorptions	2.08%	2.03%	2.14%	2.18%	2.18%
Portfolio turnover rate ⁽³⁾	48.83%	80.90%	141.35% ⁽⁵⁾	90.34%	134.95%
Trading expense ratio ⁽⁴⁾	0.16%	0.35%	0.37%	0.28%	0.34%

Ratios and Supplemental Data

Supplementary information to the Financial Highlights calculations are based on the following:

1. Net asset and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the period.
2. Distributions were paid in cash/reinvested in additional units of the Fund, or both.
3. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period. There is not necessarily a relationship between a high turnover rate and the performance of a Fund.
4. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average Net Asset Values during the period.
5. The increase in portfolio turnover ratio for 2008 is due to manager and structural changes made to the fund in September 2008. The turnover is expected to return to more normal levels during 2009.

Integra Canadian Value Growth Fund Past Performance

The performance information shown assumes that all distributions made by the investment fund in the periods shown were reinvested in additional securities of the investment fund. Note that the performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the investment fund has performed in the past does not necessarily indicate how it will perform in the future.

Fund Inception - March 12, 1999 (Prior to this date, the Fund was a non-public mutual fund)
Year-by-Year Returns

The following bar chart shows the investment fund's annual performance for each of the years shown, and illustrates how the investment fund's performance was changed from year to year. In percentage terms, the bar chart shows how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.
